

CERTUM PCC provides SSL solutions to corporations, banks, large and medium e-commerce services, small specialist companies and public administration institutions. Validation process is in English or Polish language.

CERTUM offers certificates with all validation types (DV, OV, EV). The products secure a single domain (standard), an unlimited number of subdomains (wildcard) and up to 10 different domains (multi-domain). All CERTUM certificates are recognized by most popular browsers, have financial guarantees (from 30 to 750 thousand PLN), free site seals and a free license for multiple servers.
